Webmaster reported further problems with the Carrington Chase Gate. Two emergency vehicles were observed entering the gate but later the gate did not respond to their signal. Later the gate was observed by neighbor to be open and a bolt was on the ground that had come from the gate's arm. Carrington Chase's Sales office was called but the person did not appear to have correct information. The message our caller left was that C.C. was responsible for the repair and it was fixed promptly.

Member Keith brought up the fact that he is a HAM RADIO operator and even when power is off he can get information. We will keep this in mind for future storms.

Secretary will decorate a fall theme at the center soon.

Old Business: webmaster noted that the group homes we have discussed before still appear to have several calls for EMS monthly and no new information has been supplied about the management.

No new business.

Meeting adjourned @ 8PM.
